inventor; Allowability conference with J. Richter and S. Padmanahan - decision was made to reopen indicating that the claim limitations (instant surfactants and inorganics) are commonly used in herbicide compositions and that the claimed to nonencapsulated and ecapsulated active in a composition does not render the claim patentable. It is obvious to do this in order to gain both control and immediate release characteristics for the composition being claimed.n	3/5/08	anp
